Process Management

FISHER

Emerson Process Management, Fisher

Emerson Process Management is the knowledge leader in control valve and instrument products—Fisher® brand products have remained the process control industry leader for more than 130 years. Emerson delivers products that are designed to reduce cost and maintentance while making end-users more efficient. This is enabled by world class products for industries such as severe service, chemical, oil & gas, refining, pulp & paper, life sciences, food & beverage, power, and nuclear. Emerson's process experience and worldwide research, engineering, manufacturing, and service operations serve the process industries with 14 manufacturing locations worldwide.

Emerson employees specialize in a variety of fields, including Finance, Accounting, IT, Human Resources, Marketing & Communications, Engineering, Sales, Procurement, and Manufacturing. The company also maintains an active student learning environment by offering job shadowing opportunities, a school-to-work program with area high schools, and various internships. Emerson donated land for the public library and soccer complex and employees donate humdreds of hours to community service and volunteer projects every year.
